

One-Stop Motor & PT Solutions

LEESON Canada remains the preferred source not only for the gear reducers found in this catalogue, but also for a wide range of other power transmission products:

AC and DC motors from sub-fractional through 500 HP for general-purpose and specific-purpose applications. All popular enclosures and mountings are offered, and three-phase motors 1 HP and larger come standard with the IRIS™ Inverter-Rated Insulation System.

Adjustable speed drives designed to team perfectly with many types of LEESON motors. AC pulse width modulated SPEEDMASTER® inverters are available through 60 HP. DC drives include SCR two-quadrant and four-quadrant versions as well as PWM models.

Related electromechanical products and services. Industrial control products, clutches and brakes, cables and connectors are among products offered. Services include design and assembly of motor control panels, and the Custom PDQ program for special-wound motors in small lots.
